

Report Description

TITLE: Predispatch Shadow Prices

CONFIDENTIALITY: Market Participant Specific

PURPOSE: This report contains pre-dispatch Shadow Prices at selected nodes within Ontario. When the reporting period crosses a day boundary a separate report will be generated for each day. The following information is included in this report:

- Shadow Price
- Node
- Shadow Price Type - Energy, 10S, 10N, 30R

FREQUENCY: Published hourly about 15 to 45 minutes after the hour.

GRANULARITY: Hourly

NOTES: When operating limits are binding at a specific area reserve node, the resulting penalty price is overwritten in the published reports and can be misleading for those operating reserve participants who participate at that node. It may appear as though the operating reserve quantity should have been economically scheduled but was not. If this occurs, operating reserve participants are encouraged to contact IESO's Customer Relations at customer.relations@ieso.ca to confirm their schedules.
